Mobile network operators

Turn your network into an economy

Mobile operators have billions of users. Most of them go elsewhere to move money.

Users need two things everywhere they go: connectivity and money. Mobile network operators already provide the first. Expanding into financial services is the obvious next step, yet many struggle to get started or scale their offering. The reason is structural: compliant, multi-currency payment infrastructure requires banking relationships, FX liquidity, custody and blockchain settlement capabilities that sit well outside of the core mobile network world.

The workaround means partnering with consumer fintech providers and accepting retail-grade pricing, fragmented rails and limited asset coverage. The result: billions of users going elsewhere for their financial needs.

The cost of inaction

- Untapped revenue
- Idle distribution
- A growing competitive threat

> **Omnia unlocks global payment capabilities and growth opportunity.**

Omnia unlocks global payment capabilities and growth opportunity.

A single API connection

Institutional-grade cross-asset execution

Multi-currency settlement

Direct integration into infrastructure

No liquidity partnerships to manage. No custody to build. No blockchain infrastructure to maintain. Give users multi-currency wallets and global payment rails within their existing app, while adding a high-margin revenue stream to your business.

How it works

User initiates a transaction

A currency conversion, cross-border payment or crypto transaction from within the mobile network operator's app.

Omnia executes instantly

Institutional-grade, 24/7 liquidity at committed rates.

No delay. No minimum.

Settlement completes

Omnia settles and provides custody management across asset classes, via a single API connection.

MNOs scale freely

The same flow serves every user.

Global coverage.
One integration.

Key capabilities

- Multi-currency wallet embedded via a single API integration.
- Institutional-grade FX execution with no minimum transaction size.
- 24/7 cross-border payment and remittance rails.
- Fiat, stablecoin, crypto and tokenised asset support.
- Anything-to-anything conversion across all supported assets.
- Custody and blockchain settlement.

The impact

- High-margin revenue stream on an already acquired user base.
- Competitive FX rates for users.
- Cross-asset and cross-border capability through one integration.
- Deeper user engagement and customer stickiness.
- API integration to enable financial infrastructure.

Let's talk about how Omnia can integrate into your payment flows
