Payment providers

Eliminate intraday market risk and scale global payment flows

Every payment creates a hedging problem.

Millions of payments are processed daily. Each one requires reserving the right amount of crypto, fiat or stablecoins at the moment of payment - accurately, instantly & economically.

Retail payments routinely fall below the minimum trade size on institutional exchanges, making transaction-level hedging inefficient. Fixed markups on small orders create the same challenge: margin erosion and undermined competitive pricing. Inefficiencies compound further at settlement.

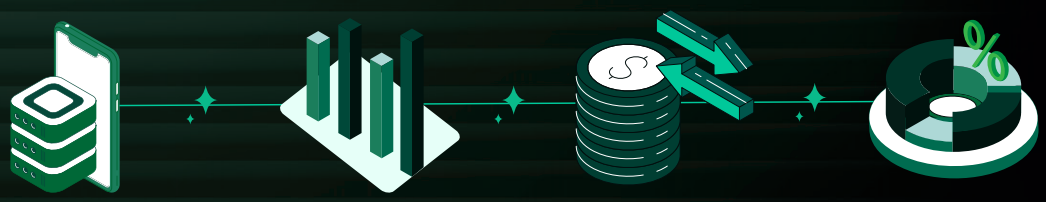

In practice, most payment firms accumulate exposure throughout the day and net it through an OTC desk, carrying intraday market risk until settlement.

The cost of inaction

- Margin erosion
- Operational complexity
- Exposure to market risk

With Omnia, every transaction is hedged instantly.

With Omnia, every transaction is hedged instantly.

A single API connection

Real-time trading execution

No minimum trade size

No fixed rate added premiums

Omnia provides continuous institutional-grade liquidity across fiat, crypto, stablecoins and digital assets. Firms can hedge at the point of payment authorisation or batch and settle on their own schedule. There is no need to build a complicated trading desk or absorb unnecessary market risk.

How it works

Customer payment

A customer initiates a payment request.

From a coffee to a cross-border payment in any amount, any asset, any time.

Instant hedge

At the moment of authorisation, Omnia executes the hedge at institutional rates.

No delay. No residuals. Hedging the exact amount.

Zero exposure

Position is covered immediately.

No monitoring market risk. No end of day OTC netting required.

Scale without restrictions

The process repeats for every transaction automatically.

Thousands per day. No additional infrastructure.

Key capabilities

- Real-time execution within your existing payment workflows.
- No minimum trade size or fixed increments, no small order premiums.
- 24/7 liquidity across fiat, crypto, stablecoins and digital assets.
- Hedge every transaction or batch and settle on your schedule.

The impact

- Zero intraday market risk, reduced black swan exposure.
- Protected margins on every transaction, regardless of size.
- Higher authorisation success rates.
- No risk management or operational overhead.
- Focus entirely on core product and customers.

Let's talk about how Omnia can integrate into your payment flows
