Stablecoin issuers

Increase stablecoin utility across trading, payments, and treasury

Without liquidity, a stablecoin is just a promise.

A stablecoin can be well-capitalised, compliant, and secure, yet still fail to scale adoption. Stablecoin adoption is driven by utility derived from interoperability for trading, collateral, payments and treasury workflows across multiple ecosystems. This is largely dependent on a stablecoin's liquidity and acceptance.

Many issuers face shallow liquidity, weak FX connectivity and fragmented markets that limit adoption. In treasury, payment and collateral workflows, counterparties are reluctant to accept a stablecoin they cannot easily convert.

The workaround, bilateral negotiations with exchanges, OTC desks and market makers, produces fragmented pricing, inconsistent coverage, and terms that don't scale.

The cost of inaction

- Limited utility
- Shallow liquidity
- Reduced acceptance
- Slower adoption
- Constrained growth

Omnia enables stablecoin utility from day one.

Omnia enables stablecoin utility from day one.

A single API connection

Institutional grade liquidity

Issuers gain 24/7 execution

No minimum trade size

One connection replaces fragmented bilateral arrangements, making the stablecoin instantly tradeable, convertible and usable across every workflow. No market-making infrastructure. No bilateral negotiations. No adoption ceiling.

How it works

Stablecoin connected

The issuer integrates once via API and provides mint and burn access to Omnia. No bilateral deals.

Liquidity activated

Omnia offers the stablecoin against all supported assets. Backed by the full depth of LMAX institutional liquidity.

Utility unlocked

Businesses and trading platforms convert to and from the stablecoin efficiently at institutional rates, at any size. Usable across payments, treasury, collateral and trading immediately.

Adoption scales

Usage grows, liquidity scales with demand. Issuers focus on ecosystem build. No market-making operations to run.

Key capabilities

- Institutional liquidity from day one.
- 24/7 cross-asset execution with no minimum trade size.
- Direct convertibility across fiat, stablecoins, crypto & tokenised assets.
- Deep FX connectivity across major global corridors.
- Single API replacing fragmented liquidity relationships.

The impact

- Deeper markets and tighter spreads.
- Improved stablecoin fungibility and convertibility.
- FX connectivity enabling on and off-ramp with local currencies.
- Acceptance across treasury, collateral & settlement workflows.
- Greater utility driving adoption and transaction volume.
- No market-making infrastructure to buy, build or maintain.

Let's talk about how Omnia can integrate into your payment flows
