# Treasury and payroll

Treasury without friction. Optimise capital at every step.

**Cross-border money movement remains unpredictable, slow and costly.**

Multinational treasury teams are responsible for more than simply managing cash. They fund payroll, pay suppliers, move capital between entities and manage liquidity across currencies. Fragmented banking relationships, slow correspondent rails and operational complexity leave capital sitting idle and treasury teams reacting rather than planning.

Each intermediary in the payment chain incurs fees, delays and conversion costs. Long settlement times leave teams carrying floating exposure on pending transfers while FX costs compound across corridors. Intercompany transfers add further complexity; netting, repatriation and short-notice funding, all require excess liquidity buffers held across currencies.

## The cost of inaction

- Settlement delays
- Idle capital buffers
- Missed yield opportunities
- Uncontrolled FX costs
- Operational overhead

**With Omnia, cross-border payments settle in seconds, not days.**

# With Omnia, cross-border payments settle in seconds, not days.

Fund payroll | Pay suppliers | Rebalance entities | Access yield

Global treasury teams move seamlessly between fiat, stablecoins and digital assets through a single integration. Capital moves where it's needed, when it's needed, keeping the balance sheet working. No trapped capital. No exposure in transit. No missed yield.

## How it works

### Funding need identified

Payroll, supplier and intercompany needs identified through existing treasury workflows.

### Capital optimised

Omnia enables instant conversion between fiat, stablecoins and digital assets, at institutional rates. Capital deployed efficiently. No intermediaries.

### Value transferred

Funds move seamlessly in seconds across banking rails or blockchain networks. No exposure in transit.

### Unlocked yield opportunities

Treasury teams can move between assets in real-time, putting excess capital to work. Treasury stays in control. Every movement visible.

## Key capabilities

- Institutional and retail cross-border liquidity.
- Institutional rate stablecoin conversions.
- Local fiat or tokenised asset off-ramp.
- Manage all asset classes through one integration.
- Instantly move between fiat, stablecoins and digital assets.

## The impact

- Controlled FX costs at institutional rates on every transfer.
- No trapped liquidity, every cent moves - no minimum trade size.
- Treasury teams focus on strategy, not day-to-day operations.
- Increased yield on corporate balances.

## Let's talk about how Omnia can integrate into your payment flows
